Introduction on creating and modifiying of CSE Portal based on *Card Jekyll Template*

Duong Do

August 11$^{\text{th}}$ 2016

For creating the CSE Portal Webpage, follow these steps:

- Go to *g*ithub.com/willianjusten/cards-jekyll-template and clone this repository.

- The follow this *B*asic Setup

- Install *N*odeJS

- Open terminal and run *npm install* and then *npm install -g gulp gulp-cli* (maybe you need to use sudo command)

- Run *"jekyll serve"* and the webpage is up on your local host.

For modifyiing the CSE Portal Webpage, follow these steps:

- Main content is written by markdown and all of them located in *post directory*. For any change in *post directory*, refresh local webpage to see the result.

- All HTML files are located in *includes directory*. Commands for regenerating: *gulp jekyll-rebuild*, then *jekyll serve*

- All styles of webpage are located in src/styl directory. You can go directly to the file and make change. Commands for regenerating: *gulp stylus*, then *jekyll serve*.

- You can also take a look at gulp *file.js* for full explain about regenerating any changes.

- We should only make changes in 3 directories: *include, post,* and *src*. The other directories and files should not been touched.
